

Uinclis Levi Martins Seebacher

IT Specialist for Application Development

Software is born from logic, but its true value lies in its stability, security, and maintainability.

Freiburg im Breisgau
Baden-Württemberg

Professional Experience

Software Developer

03/2026 – ↻

Muckenhirn Automation GmbH

- Development of object-oriented Java software for industrial automation systems.
- Programming of process control sequences for axes, sensors, and actuators.
- Use of Java, Git, and in-house automation frameworks.

Full-Stack Developer

04/2025 – 06/2026

Karl Dischinger GmbH

- Development of containerized .NET/Blazor applications with CI/CD pipelines (Drone, Docker).
- Development of new features in existing modules – analysis, implementation, and testing.
- Automation of deployments to Linux servers – focus on stability and scalability.
- Maintenance of customer-specific plugins (NopCommerce).

PC/Server Assembly

2022 – 2023

Kiebel GmbH

- Assembly and quality assurance of high-end systems for private and business customers.
- Execution of software rollouts and performance tests before delivery.
- Optimization of internal assembly processes through standardized configurations.

Team Leader – Video Encoding Department

2013 – 2022

Arriva GmbH

- Management of the video encoding department: workflows, quality assurance, and team coordination.
- Development of efficient digital media processes and automation of recurring tasks.
- Introduction of training concepts to reduce the onboarding time of new employees.
